<p>CE Mark Usage</p>		<p>4) "CE" mark is located before the product is released to the market.</p> <p>5) "CE" mark shall be placed only by the manufacturer or its authorized representative.</p> <p>6) The "CE" conformity mark indicates compliance with all requirements compulsory by the manufacturer under the technical regulations or regulations stipulating that this marking is affixed to a product. In cases where the relevant technical regulation requires compliance with other non-essential requirements, the "CE" conformity mark indicates compliance with this requirement.</p> <p>7) "CE" conformity mark indicates that the product conforms to all the provisions of the relevant technical regulations and that the product has been subjected to the necessary conformity assessment procedures.</p> <p>8) When a product is subject to more than one technical regulation requiring affixation of "CE" conformity mark, the conformity mark "CE" indicates that the product conforms to the provisions of all relevant technical regulations. Where one or more of these technical regulations give the producer a choice on implementation during a transitional period, "CE" conformity mark only indicates compliance with the provisions of the technical regulation or regulations applied. In this case, the relevant provisions of the technical regulations applied shall be indicated in the documentation accompanying the product, in the warning and instruction</p>

<p>CE Mark Usage</p>			<p>supplies the product to the market may be deemed to have received the responsibility of the producer.</p> <ul style="list-style-type: none">- The CE mark must be in the following format. The proportions should be preserved if CE mark is expanded or collapsed.- CE mark symbolizes compliance with the mandatory public benefits covered by the aforementioned directives. For this reason, it must be considered as an essential information to be communicated to the competent authorities of the member states together with other interested parties (for example distributors, consumers and other users). Accordingly, it means that all parties can reach CE mark as per visibility. The CE marking can be attached, for example, under or behind a product. It must be at least 5 mm high to be readable. Under normal circumstances, it must be irretrievable in order not to be remedied without leaving noticeable traces. (For example, some product standards use rubbing tests with water and petroleum products). However, this does not mean that the CE mark is an integral part of the product. <p>10) In cases where the relevant technical regulation requires, beside the "CE" mark;</p> <ul style="list-style-type: none">- The identification number of the notified body involved in the production control phase is also included.- The identity registration number shall be issued by the producer or the authorized representative of the
