

Inspection Management

Minimize risks

Ensure legal compliance

Inspection obligation management creates security.

Get all of your inspections from a single source.

Are you sure?

Whether

- Industrial and commercial enterprises,
 - Property management companies,
 - Local authorities (municipalities, associations),
 - Healthcare facilities,
 - Insurers,
 - Hotels,
 - Private schools,
 - Shopping centers
- or
- Zoos,

Every company is subject to various inspection obligations in regard to the energy saving certificate.

You, as the responsible person, must ensure compliance with all inspection duties at all times, and provide access to any inspection results required. This is how you keep your liability risk low.

Inspection duties are specified in various laws, ordinances, notices, national and international regulations, and manufacturer liabilities

Minimize your risk.

We check what you need.

Our Inspection Management team is familiar with all relevant laws and regulations and know which of them need to be applied in your company.

- To protect customers, neighbors, and employees
- Legal compliance in case of damage
- Improved plant safety, -availability (Minimization of shutdowns)
- On site and cross-border (throughout Europe)

The competence of an international partner paired with personal support.

Your Inspection Management at a glance.

- Software solution for transparent monitoring of inspection duties
- Database creation
- Reminders for regularly recurring tests

Because your legal compliance is our job.

- Legal requirements
- Official requirement from administrative decision
- International and national STANDARDS
- Technical guidelines
- Manufacturer requirements
- Self-checks
- Training

**One inspection organization.
One contact partner.**

TÜV AUSTRIA Inspection Management
